

Israeli life sciences firms raised record \$2.5 billion in 2020 - report aMoon Effili IATI's Israel's Life Science Annual Industry Report 2021 provides the broadest, deepest view of this thriving industry. The continuity, the annual comparison and the long-term view, all make the Report the most comprehensive take on the Israeli Life Science Industry. This quarter we have launched the report, with the presence of the Minister of Innovation, Science and Technology Orit Farkash Hacohen. The report uncovers, amongst other things, the best Biomed reality that has at any point been in Israel: the quantity of organizations has multiplied itself, and the marvelous growth of the investments arrived at another peak of 2.5 Billion dollars. **Click Here to read the Report IATI Speed Dating Event**

The life sciences companies sector gained many headlines during the Covid-19 crisis, and many of the companies associated with the crisis grew and developed. However, many companies were left behind, and in fact it was the difficulty of life sciences companies to raise funds and continue to survive during the Corona crisis. An opinion column by Yaakov Michlin, chairman of IATI, was published in Globes.

Enacting offset agreements for suppliers of pharmaceutical and medical equipment in Israel, regulations that would allocate substantial resources to the Israeli life science industry and provide a significant contribution to local economy.
