BIO-CONVERGENCE

THE NEXT ECONOMIC GROWTH ENGINE OF ISRAEL

► The Bio-Convergence Revolution

Breakthroughs in life sciences combined with accelerated development in engineering and miniaturization, computation, data processing and artificial intelligence are driving a new wave of innovation. This technological wave is called the Bio-Convergence revolution and it carries an enormous potential for a direct economic impact of up to \$4 trillion a year over the next 10 to 20 years. Bio-Convergence applications are not limited to healthcare and can be implemented in diverse fields such as agriculture, food, climate, security, energy, construction, and more.

► Bio-Convergence: A Strategic Domain

Israel Innovation Authority (IIA) recognized Bio-Convergence as a strategic domain to build the next economic growth engine of Israel. The advancement of this field will allow Israel to become a powerhouse for the next transformative Bio-Convergence revolution and among the world's health leaders of the future. Israel has a few major competitive advantages including top life sciences research, superior AI and computation capabilities, and an established industry of local and multinationals players. Bio-Convergence relies on the practical, integrative capabilities, which are at the base of Israel's greatest inventions.

► The National Bio-Convergence Program

A professional steering committee has been appointed by the Israel Innovation Authority to formulate a national Bio-Convergence Program and to present its recommendations to the National Research and Development Infrastructure (TELEM Forum) which include key stakeholders from academia, healthcare, industry, and venture capitals.

The forum identified five main areas of intervention which will support the Bio-Convergence field and accelerate its development in order to sustain a strong Bio-Convergence ecosystem. Those contents include: the establishment of dedicated R&D infrastructures

in academia and industry; the promotion of research excellence that will lead to the creation of IP in the Bio-Convergence field; development of integrated human capital to match the needs of the Israeli Bio-Convergence industry; formulation of regulation that suits the needs of this new emerging field; as well as providing financing solutions for early and high-risk interdisciplinary R&D.

Total activities that will be leveraged by the State of Israel investments in the field of Bio-Convergence over the next years, are expected to reach close to NIS 2 billion. In the future, the overall aim is to significantly expand the initial program with an emphasis on aspects of academic research in the Bio-Convergence fields.

Achievements in 2024: Advancing Bio-Convergence through Strategic Initiatives Across Diverse Applications

In 2024, the IIA highlighted and applied the concept of Bio-convergence across various sectors, recognizing its relevance to all areas of life. The principles of Bio-convergence were implemented in diverse fields such as food and agricultural technologies, green environmental solutions, construction, manufacturing, and health technologies, receiving substantial backing and funding. Five consortiums received 44 million NIS to conduct extensive research in areas including bio-chips, cultured meat, bio-plastics, liquid biopsy, and organospheres. Additionally, three infrastructure projects were funded: one focused on fermentation processes for food and agricultural technologies, another on 3D printing of biological models, and a third on the research and development of bio-chips with broad application potential. These infrastructure projects were supported with 30 million NIS throughout 2024. Furthermore, approximately 70 million NIS was allocated to innovative proposals, fostering increased activity in both industry and academia, and contributing to the dynamic evolution of the Bio-Convergence landscape.

Sanford T. Colb & Co. **Protecting Innovation, Advancing Technology**

At Sanford T. Colb & Co., we believe that fostering innovation goes beyond protecting intellectual property—it means actively supporting the communities that drive progress. As part of our commitment to Israel's dynamic tech and innovation ecosystem, we proudly sponsor MIXiii 2025 and other key industry events that bring together visionaries, entrepreneurs, and global leaders.

We are a full-service intellectual property and technology firm, providing patent, trademark, litigation, and IP strategy services to Israeli and international innovators. With deep scientific and legal expertise, we help clients secure, enforce, and maximize the value of their intellectual assets in an evolving global market.

We look forward to engaging with industry leaders, start-ups and innovators. Let's connect at the conference or afterwards. Feel free to call, or to send an e-mail or WhatsApp text to:

WELCOME LETTER

Dear Industry Colleagues,

We are delighted to welcome you to the **MIXiii Health-Tech.IL 2025** Conference and Exhibition, led and organized by Israel Advanced Technology Industries Association (IATI) at the International Convention Center (ICC) in Jerusalem.

We are excited to host this prestigious Health-Tech and Life Science conference which aims to bring together leading researchers, scientists, professionals, entrepreneurs, investors and academia from around the globe. Over the course of two days, we anticipate fruitful discussions, knowledge exchange, and collaborative opportunities that will help shape the future of the life sciences industry.

The innovative spirit within Israel's life sciences sector has led to significant breakthroughs in recent years, especially in areas where these disciplines intersect. The synergy between engineering and biology, coupled with the rapidly growing field of AI, digital health and remote medicine, has paved the way for cutting-edge technologies that are poised to make a profound impact on global healthcare. The expertise developed in these domains is not only impressive but also indicative of the forward-thinking approach that Israeli companies are known for.

We have meticulously crafted a dynamic and diverse program featuring keynote speeches, panel discussions, breakout sessions, workshops, and a startup competition. Our goal is to deliver a comprehensive and engaging experience for all attendees while providing startups with valuable exposure to funding opportunities and special B2B meeting tools.

To address the special challenges facing the world and especially Israel in these times we added a special session discussing rehabilitation and exciting technologies in this space, as well as special sessions on funding, testing drugs with chips instead of animals and many more exciting topics.

This conference presents a unique opportunity for startups to connect with top investment funds, both local and international, including key sponsors and first-time to present venture capital funds in Israel. Attendees will gain direct access to global corporations, industry leaders, and top investment bankers, fostering high-value networking and funding prospects in the health care space. **Organized by the industry and for the industry**, MIXiii Health-Tech.IL is heavily supported by various Israeli government offices and sponsored by major companies in the health care space.

We extend our sincere gratitude to the **MIXiii Health-Tech.IL Steering Committee** members for their contributions: Prof. Irit Sagi, VP for Innovation & Technology Transfer, Weizmann Institute of Science; Shai Melcer, Ph.D., Head of the National Bio-convergence Program, Israel Innovation Authority; Regine Shevach, Healthcare Business Consultant, Former Country Speaker & Managing Director of Merck Biopharma & Electronics (Israel); Liron Dover, Head of Bio Jerusalem & JNext, The Jerusalem Development Authority; Karin Mor, Director of Health, Israel Export Institute .

We look forward to welcoming you all to the MIXiii Health-Tech.IL and creating a memorable and impactful experience for everyone involved.

Sincerely,

Karin Mayer Rubinstein

— teva — מטפלים בנפש

אחד האתגרים הגדולים, איתם ישראל נאלצת להתמודד בתקופה האחרונה, הוא הטרואמה.

לכן אנו בטבע התגייסנו והקמנו את "מטפלים בנפש", תכנית לקידום הטיפול בטרואמה הישראלית ולחיזוק חוסנה הנפשי של החברה הישראלית.

התכנית מציעה הכשרות והדרכות למטפלים, בניית חוסן קהילתי, מימון פיתוח או הטמעה של טכנולוגיות, מחקרים ועוד. אנו מזמינים אתכם לקחת חלק בתכנית עם מגוון אפשרויות תמיכה ושיתופי פעולה.

יחד נקדם את הטיפול בטרואמה הישראלית ונחזק את חוסנה של ישראל.

Merck

Merck KGaA, with headquarters in Darmstadt, Germany, is a global team of science and technology specialists in Healthcare, Life Science and Electronics. We believe in science as a force for good.

We make a positive difference in millions of people's lives.

In Healthcare, we develop innovative pharmaceuticals for unmet challenges, particularly in Oncology, Neurology & Immunology, Fertility and Endocrinology.

In Life Science, our tools, services and digital platforms empower scientists and engineers in delivering breakthrough therapies more quickly.

In Electronics, we create the next generation of materials and solutions for the semiconductors industry.

Merck in Israel

Merck has recognized decades ago the high level of science in Israel. It now operates in Israel active research and development centers in all three of its fields of interest and is highly involved in the Israeli ecosystem. Merck collaborates with leading local academic institutions, medical centers, the Israel Innovation Authority and entrepreneurs. Through various programs and local innovation incubators, Merck supports new ideas on their way to world markets.

Merck is constantly scouting the vibrant Israeli ecosystem for innovations in its areas of interest.

We invite you to consider us
as your future partner.

About AWS

Since 2006, Amazon Web Services (AWS) has been the world's most comprehensive and broadly adopted cloud. AWS has been continually expanding its services to support virtually any workload, and it now has more than 240 fully featured services for compute, storage, databases, networking, analytics, machine learning and artificial intelligence (AI), Internet of Things (IoT), mobile, security, hybrid, virtual and augmented reality (VR and AR), media, and application development, deployment, and management. These services are offered in 102 Availability Zones within 32 geographic regions, with announced plans for 15 more Availability Zones and five more AWS Regions in Canada, Germany, Malaysia, New Zealand, and Thailand. Millions of customers—including the fastest-growing startups, largest enterprises, and leading government agencies—trust AWS to power their infrastructure, become more agile, and lower costs.

Sullivan manages a substantial amount of legal work for Israeli companies and U.S. companies with Israeli interests. Our Israel practice team not only has deep experience representing Israeli companies, but we are one of the few U.S. firms with an office in Tel Aviv. Our presence in Tel Aviv, the hub of Israel's high-tech economy, serves as a gateway for Israeli public and private companies, entrepreneurs, investors, funds and other professionals to gain entry into the U.S. market. Our global capital markets team in Tel Aviv has extensive experience representing companies, underwriters and funds in connection with offerings on the TASE and Nasdaq. Along with our teams in New York and Boston we are able to serve Israeli public companies 24/7 and help them complete an offering involving both jurisdictions in an effective, efficient and smooth manner.

The National Program for Economic Growth

The Ministry of Economy and Industry is launching the national program for economic growth as part of the development of the economic vision for the State of Israel.

The national program for economic growth is based on Porter's model of competitive clusters, where the business sector leads while the government provides targeted support and assistance to specialized market activities.

1 Collecting, mapping and analyzing data from various databases. Developing an advanced system accessible to various players in the ecosystem.

2 Development, preservation and strengthening of the cluster ecosystem on all its components and levels.

3 Updating tools for government intervention and multi-sector partnerships to boost economic development and investment in the cluster.

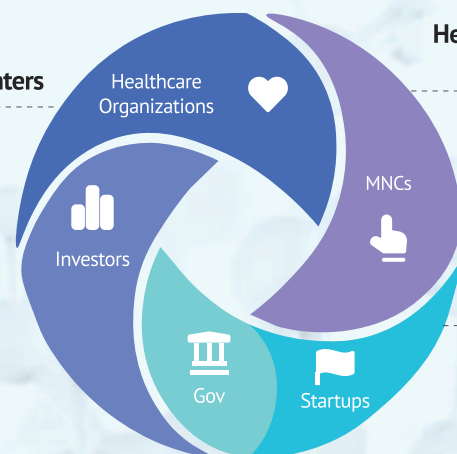

4 Expanding markets and exposing Israeli companies and cluster products to global opportunities.

 Tel: 08-9360950

Company description & Field of Activity:

Analyst Research Laboratories is a GLP, GMP and GCLP accredited, US-FDA registered and inspected Analytical Chemistry Contract Laboratory. We provide analytical services to the Pharmaceutical, Biotech, Medical Device, Cosmetics, Chemical and Medical Cannabis industries, complying with the strictest demands of regulatory authorities in the USA, Europe and Asia (FDA, EPA, ICH, USP and OECD).

Arrakis Bio

Address: 18 Hakishon St. Yavne, Israel
 Tel: 052-8743330
 Email: info@arrakis.bio
 Web site: <https://www.arrakis.bio>

Contact person:

Name: Fabian Trumper, CEO
 Tel: 052-8743330
 Email: fabian@arrakis.bio

Company description & Field of Activity:

Collagen is the best regenerative biomaterial for Medical Devices and Aesthetics, with applications in Orthopedics, Ophthalmology, Wound Care, Plastic Surgery and more. However, current commercial sources of Collagen are prohibitively costly and exclusively animal-based, constraining the widespread use of Collagen in biomedical and aesthetics applications. Arrakis Bio develops a proprietary bio-technology platform to produce human-identical, biomedical-grade True Collagen for the Medical and Aesthetics markets at an industrial scale and at a fraction of the cost.

Field Of Activity:

Medical Aesthetics, Biomedical Materials, Regenerative Medicine, Tissue Engineering.

**Avertto**

Address: Aderet 1037
Tel: 058-468-5423
Email: info@avertto.com
Web site: Avertto-monitor.detect.alert.

Contact person:

Name: Hilla Ben Pazi
Tel: 058-468-5423
Email: Hilla@avertto.com

Company description & Field of Activity:

Avertto develops a medical device to monitor, detect, and alert for stroke before neurological injury. Using novel barosensors and advanced AI algorithms, Avertto identifies deviations from individual baselines, enabling timely intervention. The company has achieved remarkable clinical trial success, detecting large vessel occlusions with 100% sensitivity and 86% specificity. Currently, they are developing an external ICU device and plan to create insertable devices for home use, raising \$4M with \$2M already committed for a new clinical study with real - time alerts.

**Amazon Web Services**

Address: 121 Menachem Begin street, Tel Aviv
Web site: <https://aws.amazon.com/health/>

Contact person:

Name: Tomer Ofir
Tel: 054-6711022
Email: awstomer@amazon.com

Company description & Field of Activity:

Amazon Web Services (AWS) is the world's leading cloud computing platform, offering over 200 fully-featured services from data centers globally. Launched in 2006, AWS provides organizations of all sizes with on-demand computing power, storage, and a comprehensive suite of cloud solutions. With specialized features for healthcare compliance and security, AWS enables medical institutions to modernize patient care, accelerate research, and manage sensitive data with confidence. The platform's pay-as-you-go pricing model, robust security features, and extensive partner network make it a cornerstone of modern digital infrastructure.

**S. B. Technologies**

Address: Basel 25 Petch Tikva
Tel: 0527950901
Email: office@b-online.co.il
Web site: <https://b-online.co.il/com>

Contact person:

Name: Nili Francke
Tel: 0527950901
Email: office@b-online.co.il

Company description & Field of Activity:

At b-online, our vision is to help businesses grow by using innovative online solutions. We aim to break down barriers and enable businesses to thrive. We proudly support and collaborate with top pharmaceutical companies, medical experts, healthcare professionals, and providers to advance digital health. Our platform is designed to give patients and healthcare professionals the information they need, helping to reduce unnecessary suffering and improve treatment understanding.

**BETALIN THERAPEUTIC**

Address: Jerusalem Bio Park (JBP), Minrav Bldg, 1st Floor, Hadassah Ein Keren Campus, Jerusalem, Israel.
Tel: (+972) 02-9922025
Email: racheli@betalintherapeutics.com
Web site: <https://betalintherapeutics.com/>

Contact person:

Name: Racheli Ofir
Tel: 0507289609
Email: racheli@betalintherapeutics.com

Company description & Field of Activity:

Betalin Therapeutics: A Breakthrough in Diabetes Treatment Betalin Therapeutics is pioneering a regenerative solution for diabetes by developing an innovative micro-pancreas to restore β -cell function. With over 500 million people affected worldwide, current treatments rely on insulin replacement, which does not address the root cause. Traditional islet transplantation faces challenges in engraftment and availability. Betalin's approach provides a supportive microenvironment to enhance cell survival and function, offering a scalable, long-term therapy to achieve normoglycemia and revolutionize diabetes care.

**BioLight Life Sciences, Ltd.**

Address: Aba Hilel 12, Ramat Gan, 5250606, Israel

IATI, Israel's Association of Tech Industries, is the non-profit organization (NGO) dedicated to fostering business continuity and stability for Israel's advancing tech sector. IATI leads strategic, large-scale, and capital-intensive initiatives with key industry players and the Israeli government, bringing together industry leaders to voice shared concerns and influence public policy decisions. As the umbrella association of the advanced industries, IATI connects and unites Israel's tech ecosystem, bringing together hundreds of members from all industry segments, including venture capital and investment funds, growth-stage and established Israeli companies, multinational R&D centers, startups, healthcare providers, tech transfer organizations, academic institutions, incubators, innovation centers and more. Through global partnerships and strategic networking, we create business opportunities and build meaningful bridges between our members and the international community. IATI Website: iati.co.il

RAISING HEALTH STANDARDS

The first-of-its-kind collaboration between NTT Corporation and a leading Israeli health organization aims to help companies worldwide to enhance the efficiency of their research and train AI tools on medical data

4 Nov 2024

NTT Israel creates collaborations between the Israeli innovation ecosystem and the NTT group and its customers by focusing on three main activities: Initiating and facilitating commercial transactions between Israeli tech companies and the NTT group and customers, promotion of investments by the NTT group and co development with Israeli companies and academia to generate new services.

Technology that Empowers, Humanity that Cares Maccabi's Innovative app Triage for Mental Health

About Maccabi Healthcare: "Maccabi Healthcare Services" is Israel's second-largest health organization serving over 2.6 million members and providing comprehensive healthcare through innovative digital solutions.

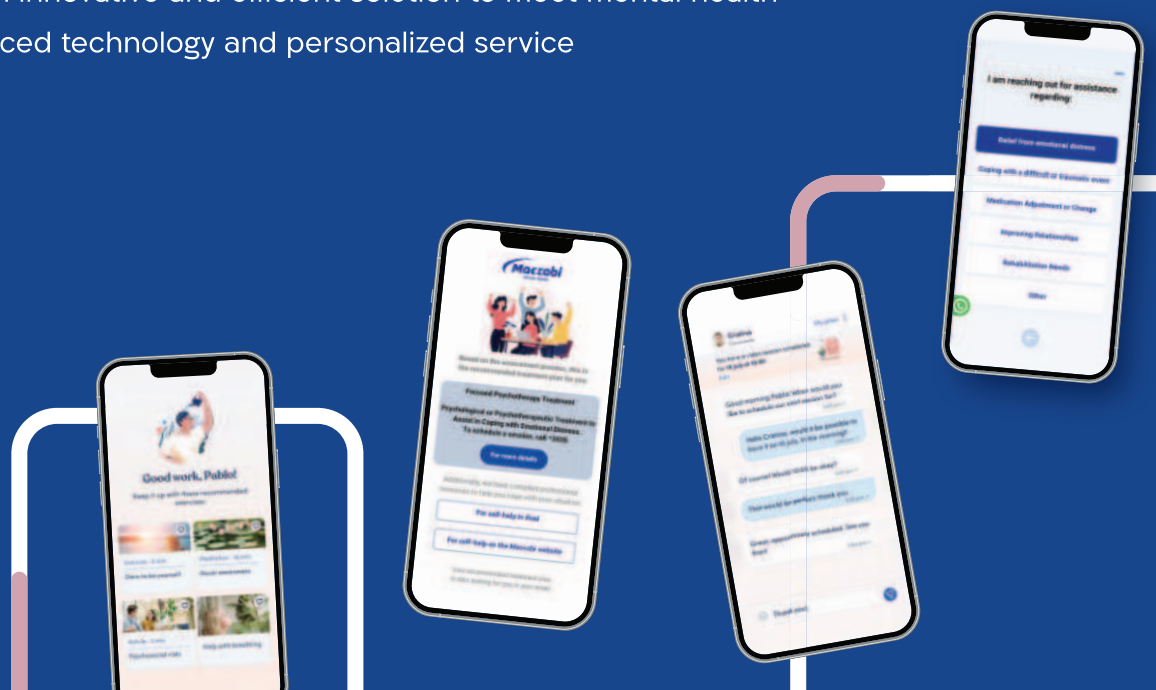

Meeting Our Members' Mental Health Needs: In response to the growing need for mental health support, Maccabi has partnered with Ifeel, an Israeli startup, to offer a mental health triage service. This digital platform enables patients to connect with a therapist via chat or video consultation for an initial intake, assessing their mental health status and personal needs to guide them to the most suitable mental health services available at Maccabi.

The Digital Triage Platform: Our cloud-based mental health triage system includes three simple steps:

- 1. Digital Questionnaire:** Preliminary information is obtained through a short digital questionnaire that helps therapists assess the patient's mental state before conducting the intake.
- 2. Initial Intake:** After completing the digital questionnaire, an intake session is conducted via chat or video with a qualified mental health therapist within 48 hours.
- 3. Referral to Appropriate Treatment:** At the end of the conversation, the therapist provides a recommendation for the type of mental health service suitable for the patient's needs from the variety of services available within Maccabi, including psychotherapy, group therapy, psychiatric treatment, self-help tools, and more.

Our platform offers an innovative and efficient solution to meet mental health needs, utilizing advanced technology and personalized service
