

# IATI Israeli Health-Tech Venture Capital Funds Survey: What To Expect in 2025

 IATI Connects Israel's Tech Ecosystem

In cooperation with:

As part of the IATI Life Science & Health-Tech Annual Industry Report, launched at the MIXiii Health-Tech.IL Conference 2025, IATI conducted its annual in-depth survey among members of the IATI VC & Investment Funds Committee. The survey gathered insights into their activities, investment strategies, and outlook in light of the Iron Swords War, as well as their expectations for 2025.

The VC sector remains a cornerstone of Israel's tech-driven economy, enabling groundbreaking innovations to grow from bold ideas into global impact. Understanding the perspectives of this influential sector is key to navigating the challenges and opportunities that lie ahead.

I would like to extend my sincere gratitude to PwC for their collaboration in preparing this important survey.
