Q2 2025 Committees Quarterly Meetings

IATI MNC CEOs Forum

As part of our ongoing work at IATI, we held the quarterly meeting of the IATI MNC (Multinational Companies) CEOs Forum. During the meeting, we reviewed the forum's activities across various areas.

We were pleased to host Dr. Shmuel Abramzon, Chief Economist at the Ministry of Finance, who provided the forum with an overview of Israel's macroeconomic situation, as well as Sharon Shulman, Chairman & CEO of EY Israel and leader of the IATI International Tax Committee, who shared important updates from the committee's activities.

Thank you to all forum members for their participation and for their continued commitment to collaboration and promoting business continuity and certainty across the industry. Special thanks to Herzog for kindly hosting the meeting.

Q2 2025 Committees Quarterly Meetings

IATI Legal & Accounting Committee

IATI Global Companies HR Workgroup

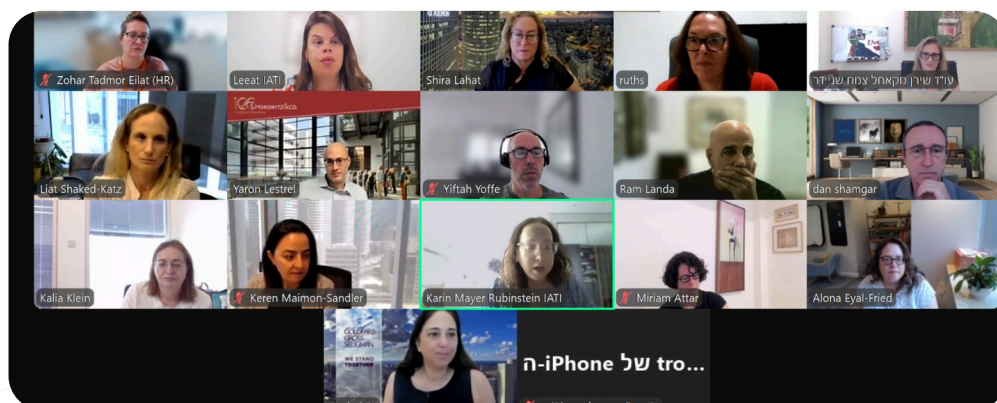

This Quarter, IATI convened the quarterly gatherings of the Legal & Accounting Committee, along with the HR Global Companies Workgroup. These meetings were both productive and impactful, and in light of the circumstances, their timing was particularly significant. The discussions addressed a range of challenges, questions, and practical solutions related to how companies and organizations are navigating the implications of Operation “Am K’Lavi.”

IATI Lablor Law Workgroup

The new IATI Labor Law Workgroup has officially launched. Operating under IATI's Legal & Accounting Committee, the Group will focus on labor law issues impacting the industry — and especially, how to create order in a constantly changing landscape. The kickoff meeting was held at S. Horowitz & Co., and included an open discussion where the group's main areas of focus were defined.

At the initiative of the group's members, an additional session was held with senior HR representatives from several global companies, members of IATI. The meeting aimed to deepen the understanding of current labor law challenges in Israeli high-tech and to help shape the group's future activities and priorities.

We thank all the Group's members for their commitment and are excited to embark on this meaningful joint journey.

‘Meshuhreret-Tech’ Program 2025

Meshuhreret-Tech is an initiative designed to encourage discharged female soldiers with strong mathematical skills to pursue academic studies and careers in engineering and technology. Led by IATI and the Socio-Economic Forum, in partnership with the IDF’s “Sha’ar Leatid”, the Ministry of Defense (Discharged Soldiers Department), Israel Aerospace Industries (IAI), and the Israeli Presidency of Business Organizations, the program combines foundational courses in technological fields, personal mentoring by industry leaders, and visits to leading companies. Together, these elements provide participants with tools, knowledge, and confidence to build their future in Israel’s high-tech and engineering sectors.

We are proud to mark the conclusion of the third cohort of Meshuhreret-Tech. The cohort wrapped up with a closing event at ELTA in Ashdod, which included opening remarks, the awarding of certificates, and a lecture on innovation and technological development.

We thank all the companies and mentors who took part and helped open doors for talented women entering the innovation industry. Companies interested in joining the next cohort or exploring further collaborations are welcome to contact us by [email](#).

From Bench to Market: Life Sciences Funding Channels Forum

During the past quarter, we held a conference on financing channels, led by IATI and Lipa Meir, aimed at exploring smart and innovative funding strategies for entrepreneurs and startups in the fields of healthcare, life sciences, and medical technologies. Throughout the event, leading experts discussed investment strategies and alternative financing solutions, while participants gained valuable insights and expanded their professional networks.

Thank you to all participants for the inspiration and fruitful discussions. We remain committed to advancing innovation and business certainty in Israel.

AI For All

We are proud of the IATI and Ministry of Education collaboration as part of the mentoring program within the “AI for All” initiative, which concluded this quarter. Throughout the program, we connected Israel’s leading companies with the Ministry of Education. Thanks to this partnership, dozens of outstanding mentors visited schools across the country, bringing knowledge, inspiration, and vision that introduced artificial intelligence to the educators of the next generation.

This collaboration is part of a broader set of initiatives we are driving to promote diversity, inclusion, and the business continuity of Israel’s tech industry.

The future is already here—and we are proud to take an active part in shaping it.
